

## Operating in Regulated environment

**By FDA Expert with decades of experience in Regulatory Compliance**

*A 9-hour workshop, (four evenings) held in our state of art BioScience Education Building, Germantown Campus.*

**February 7 - 6 - 8.15 PM) and  
February 14 - (6 - 8.15 PM) and  
February 21 - (6 - 8.15 PM) and  
February 28 - (6 - 8.15 PM)**

The focus of this course is to learn the purposes, organization, business, activity, challenges/risks, job opportunities, best practices, and how to strive for success as a professional in the areas of development/manufacturing of consumer products, contract research, contract manufacturing, biotech, and pharmaceutical organizations overseen by regulatory agencies in the United

States. This course is conducted in an interactive way to ensure students can directly participate in the discussion and leave with a clear understanding about those industries and the related critical regulations that need to be followed and consistently practiced.

Participants will be able to learn about approach and efficient ways to network, seek jobs, and explore best practices to serve the regulatory agency sectors.
