

## Montgomery College WDCE Project Management Instructors

Our team of instructors have extensive project management experience across different industries. All of our instructors are current PMP® Credential holders and have experience in both predictive and agile projects.

### **Natalya H. Bah, PMP, CSM**

Natalya Bah provides her clients with team building, training and strategic advising services utilizing her passion about project management, leadership development and goal setting through Natalya H. Bah Consulting. In addition to being a certified project manager, Natalya is also a certified Birkman Method© consultant. She utilizes this self-assessment along with her Define and Achieve Your Goals Process™ with her diverse set of clients.

Natalya is the co-author of six books in the Success Mindsets and Accelerators Series- The Power of Perspective, The Power of Purpose, The Power of Passion, The Power of Perseverance, The Power of Preparation and The Power of Positivity. She also speaks at conferences such as the Project Management Institute Global Congress and the Department of Housing and Urban Development Exceptional Leaders Conference. Natalya received her Master of Science degree in Project Management from GW's School of Business.

### **Jamal Douglas, PMP, MBA, PMI-ACP, SSBB, ITIL V3, CISM**

Jamal has managed the delivery of enterprise level technology capabilities and process improvement initiatives in the finance, healthcare and public sector industries. Leading cross-functional delivery teams, both internally and externally in multiple consultancy roles, Jamal has leveraged multiple control, project and process improvement methodologies to create value, increase efficiency and reduce waste. He currently leads a team of over 20 IT professionals in the delivery of shared technology and project management services at the National Institutes of Health.

Jamal has developed and delivered curriculum (+2500 hours) supporting the continued education of collegiate, professional adult learners in the areas of project management, Six Sigma (green and yellow belt) and certification preparedness (CAPM and PMP).

**Bobby Underwood, *PMP, FAC-PMIII, PMI-ACP***

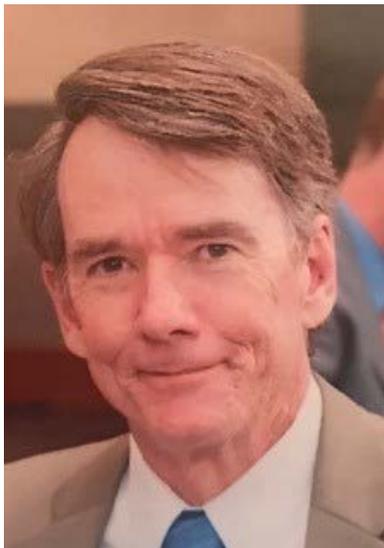

Bobbye is an IT Project Manager for private industry and the federal government. Received B.S and M.S from Georgia State University, a Master's Certificate in Project Management from George Washington University. She has held numerous positions with Project Management Institute including serving on the PMI® Standards Membership Advisory Group and the Program Management Standard Update team. She has extensive experience teaching a variety of computer courses and project management.

**Charles Warner, *PMP, ACC***

Charles has 30 years of experience in various leadership positions. Most of his 30-year career has been in project management, including leading several different Project Management Offices for various organizations. In addition, Charlie has been teaching project management, leadership, interpersonal communication, and other subjects for over a decade.

Charles also has a wealth of professional coaching training and experience. He is credentialed as an Associate Certified Coach (ACC) from the International Coach Federation (ICF) and is also a graduate of Georgetown University's Leadership Coaching program.

**John Keegan, *PMP, MBA, SSGB***

John is a retired US Postal Service senior executive with over 35 years of service. He spent his early years as the Manager, Automation Equipment at the USPS Engineering Systems. In that capacity he was responsible for overseeing a team of project managers that guided the development, requirements, logistics, acquisition and deployment of over \$3 billion in mail automation equipment and software. These projects made a significant impact on streamlining the efficiency of our nations mail processing centers.

John spent his last years at the USPS as the Manager, Engineering Software Management. He led a department of over 100 technical professionals, responsible for the development, testing and integration of the automation software on the machines at the mail processing centers. John enjoys teaching at Montgomery College where he is able to share his real-life lessons learned from many years of leadership and project management experience.
